

TNMP SCORE®, CitySmart® & Commercial Solutions Programs

PROJECT PROCESS FLOWCHART

1. PARTICIPATION AGREEMENT

- Sign the enrollment agreement, which formally enrolls the partner into one of TNMP's programs, authorizes CLEAResult to perform a walkthrough assessment and allows TNMP to pay incentives to the partner.

2. PRE-INSPECTION

- CLEAResult documents & verifies existing equipment before removal. New construction projects must have construction drawings submitted for estimated savings calculations.
- Estimated incentive is calculated off existing equipment; if equipment isn't pre-inspected prior to removal, the program cannot incentivize the project.

3. INCENTIVE APPLICATION

- Confirm the timeline and project scope provided in incentive application (NOTE: Incentive funds are not guaranteed upon project completion without an approved incentive application).
- CLEAResult performs preliminary incentive & energy savings calculations.

4. CONSTRUCTION

- Partner implements project & notifies CLEAResult of any scope changes.
- Partner notifies CLEAResult upon project completion.

5. POST-INSPECTION

- CLEAResult documents & verifies new equipment installation.
- CLEAResult finalizes incentives & energy savings.

6. INCENTIVE CHECK

- TNMP issues check to partner (takes approximately four to six weeks). NOTE: Incentive check is a live check made to the attention of the person who signed the enrollment agreement – it is not a discount on the monthly bill.
