

Instructions for Energy Efficiency Identification Notice Form for Distribution Voltage Industrial Customers Pursuant to P.U.C. Subst. R. 25.181(u)

Note: This form applies only to a for-profit entity engaged in an industrial process taking electric service at distribution voltage that qualifies for a tax exemption under Tax Code §151.317. Do not use this form if you intend to allow the facilities identified in this notice to participate in any utility-sponsored energy efficiency programs provided by TNMP for the three years following the effective date.

- A. A completed notice form shall consist of the following.
 - 1. A completed Energy Efficiency Identification Notice Form for Distribution Voltage Industrial Customers.
 - 2. A copy of the customer's Texas Sales and Use Tax Exemption Certification (pursuant to Tax Code §151.317).
 - 3. A spreadsheet containing all ESI IDs.
- B. The identification notice is limited solely to the metered point of delivery of the industrial process taking place at the consuming facilities. A metered point of delivery is identified by an ESI ID in competitive areas and a utility account number in non-competitive areas.
- C. Eligible meter points are those metered points of delivery for a for-profit entity that is engaged in an industrial process taking electric service at distribution voltage that qualifies for a tax exemption under Tax Code §151.317.
- D. Identification Notices shall be submitted not later than February 1 to be effective for the following program year.¹
- E. Identification Notices are effective for a three-year period and must be renewed every three years.
- F. Identification Notices will be treated as confidential, highly sensitive protected material by the utility.
- G. The completed notice shall be submitted via email to:

Stefani Case, Energy Efficiency Manager
Texas-New Mexico Power Company
stefani.case@tnmp.com
214-222-4174

¹ January 1 to December 31, each year.

CONFIDENTIAL—HIGHLY SENSITIVE PROTECTED MATERIAL

Energy Efficiency Identification Notice Form for Distribution Voltage Industrial Customers
